

HOW DO I GET MY VACCINATION?

Some GP practices do not keep the vaccines in stock therefore you may have to get a private prescription from your GP and take it to a community pharmacy to be dispensed.

The pharmacy will charge for dispensing the prescription based on the cost of the vaccine. This may be substantially more than an NHS prescription charge and can vary between different pharmacies.

You may want to ask different pharmacies for a quote before choosing where to have your prescription dispensed.

FURTHER INFORMATION

NHS Choices provides health advice for travellers, including:

- How to obtain a European Health Insurance Card
- How to get medical treatment abroad and information on staying healthy while away.

These websites should be used in addition to advice from your GP practice and community pharmacist.

TRAVEL

VACCINATIONS

This leaflet explains why some vaccinations are not available for travel purposes on the NHS

WHAT DO I NEED

WHEN TRAVELLING?

In the UK, the childhood vaccination programme protects you against a number of diseases such as tetanus, but it does not cover most of the infectious diseases that are found overseas.

If you are planning to travel outside the UK, you may need to be vaccinated against some of the diseases found in other parts of the world.

Many vaccines are not covered under the NHS and so we are obliged to prescribe them privately if necessary. This includes vaccines such as Hepatitis B, Meningitis ACWY and Rabies.

CHARGES

Charges can include:

- Fee for writing a private prescription
- Dispensing fee, including cost of the vaccine
- Fee for administering the vaccination
- Fee for certificate of vaccination
- Fee for testing for immunity.
- There is no standard fee and different GP practices may have different charges.
